

# ICH Public Meeting

ICH Expert Working Group and Steering Committee Meetings  
October 23-26, 2006  
Chicago

**Justina A. Molzon, M.S. Pharm., J.D.**  
**Associate Director for International Programs**  
**Center for Drug Evaluation and Research**  
**U.S. Food and Drug Administration**

**CDER ICH Steering Committee Representative**

# Topics to be Covered

- ICH overview
- Guideline implementation process
- CTD/eCTD background
- Global Cooperation Group

# ICH

INTERNATIONAL CONFERENCE ON  
HARMONIS/ZATION  
of  
Technical Requirements  
for the Registration of  
Pharmaceuticals for Human Use

<http://www.ich.org>

Hosted by ICH Secretariat  
IFPMA-Geneva, Switzerland

# A Unique Approach

- ICH was created in 1990
- Agreement between the EU, Japan and the USA to harmonize different regional requirements for registration of pharmaceutical drug products
- Unique because joint effort by regulators and associated pharmaceutical industry trade associations

# ICH Objectives

- Identification and elimination of the need to duplicate studies to meet different regulatory requirements
- More efficient use of resources in the R&D process, as a consequence
- Quicker access for patients to safe and effective new medicines

# Expert Working Groups

**SAFETY**

**EFFICACY**

**QUALITY**

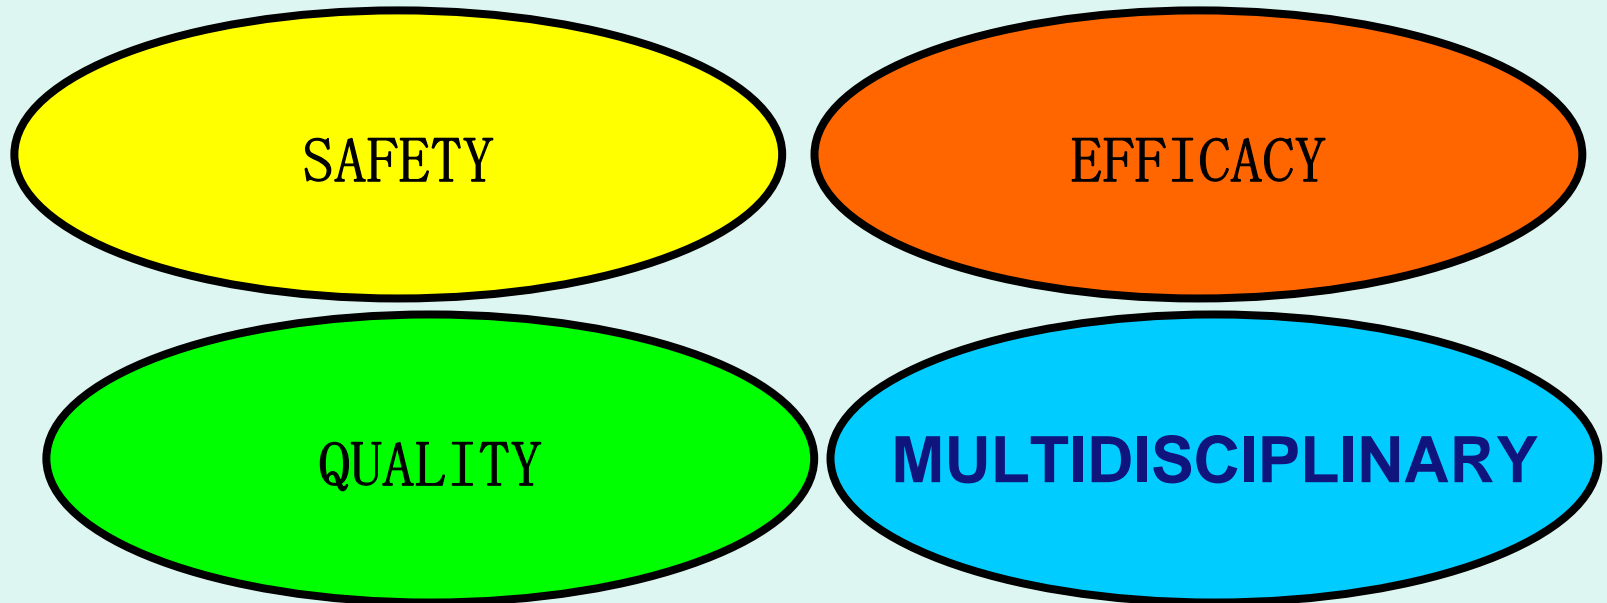

**MULTIDISCIPLINARY**

**STEERING COMMITTEE**

Monitors and Facilitates EWGs

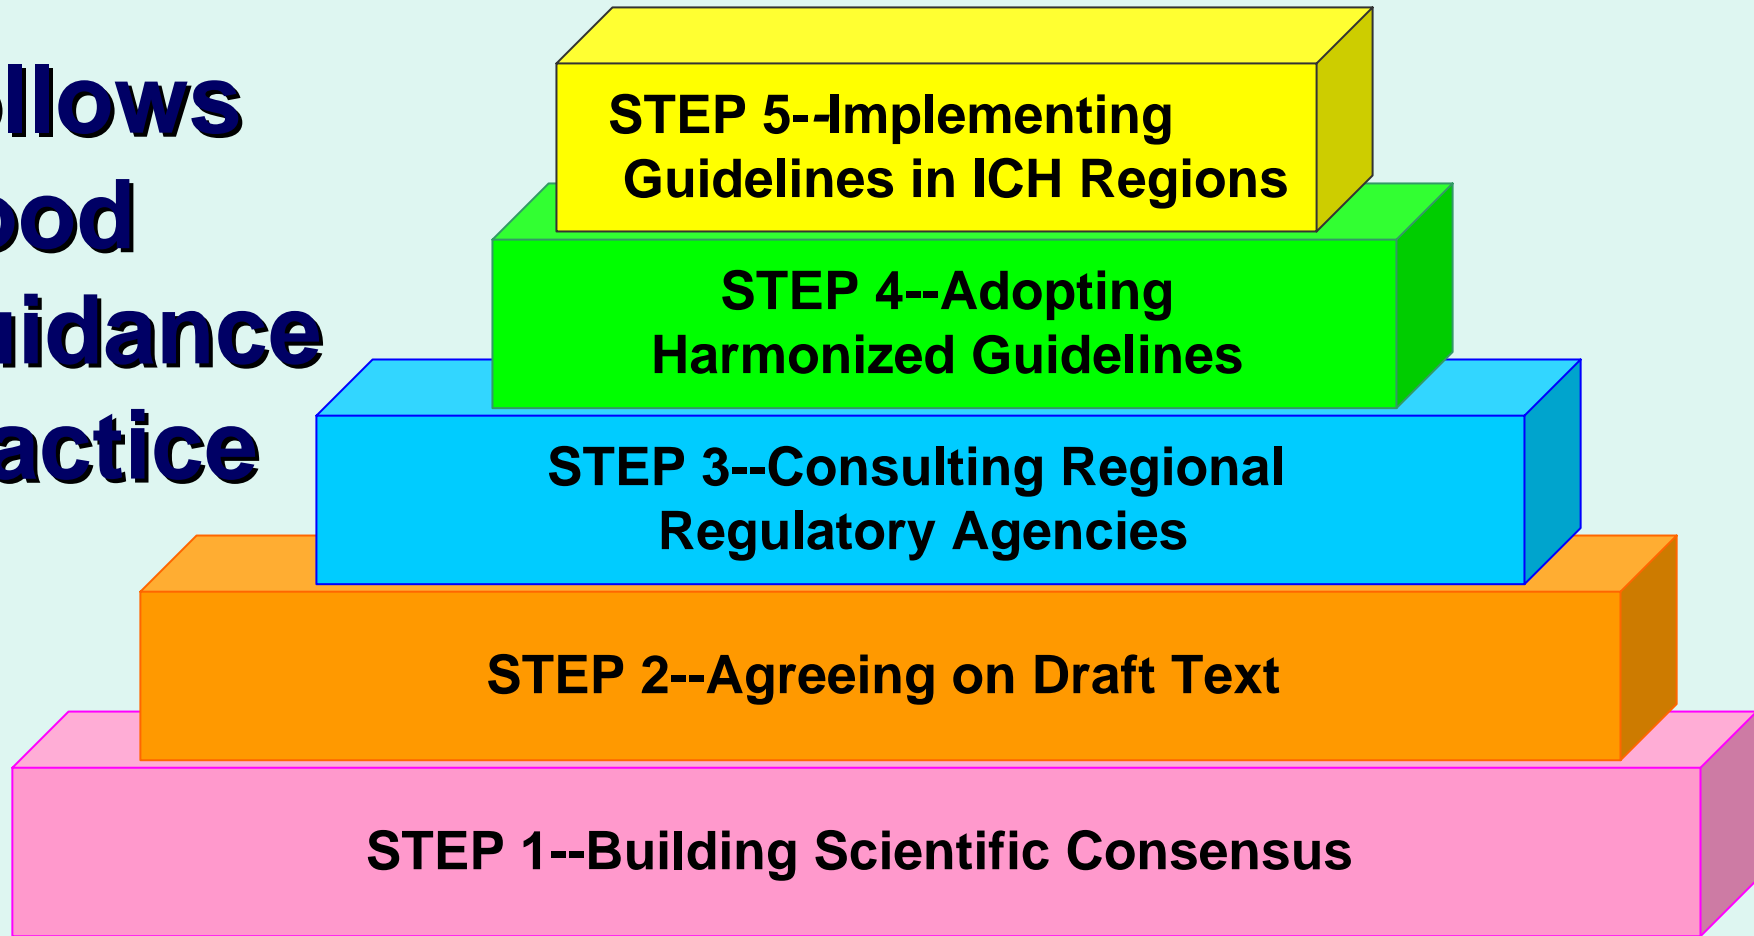

# Expert Working Groups

- An EWG for each ICH Topic
- 6 Topic Leaders - one from each ICH party
- Develop consensus on technical issues
- Result in ICH Guidelines (E, S, Q, M)

# Steps of ICH Harmonization

**Follows  
Good  
Guidance  
Practice**

# Implementation Process Flow

## *Process*

## *Implementation Step*

## *Actions*

Good guideline topic selection

**Topic Selection**

Guideline must be value-added and 'implementable'

Formal communication process

**Dissemination**

Use multiple avenues

Active distribution

**Publication**

Targeted; via meetings; also to non-ICH groups

Educating users

**Training**

Early, often, all'; within and across organizations

Putting guideline 'theory' into 'practice'

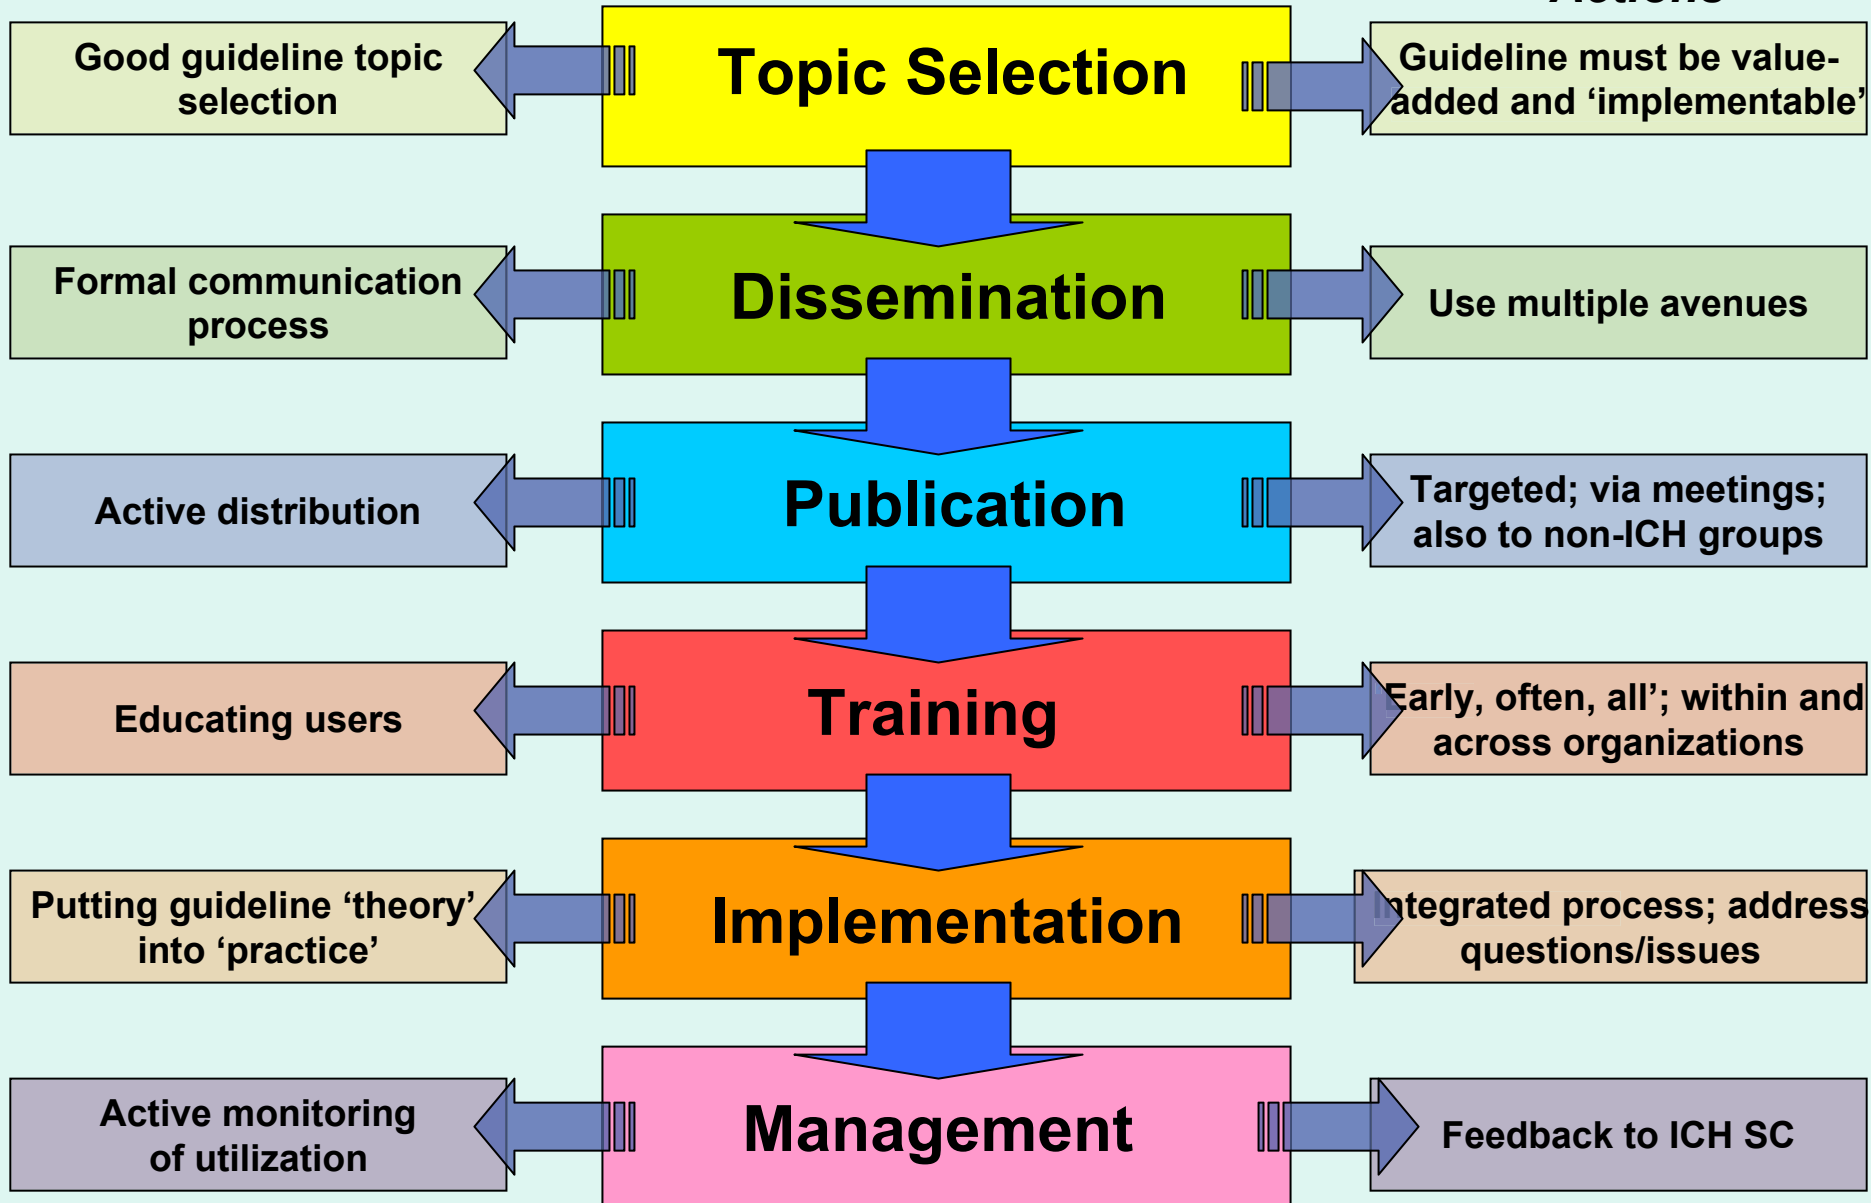

**Implementation**

Integrated process; address questions/issues

Active monitoring of utilization

**Management**

Feedback to ICH SC

# Harmonized Guidelines

- **Efficacy** - 13 topic headings/17 guidelines
- **Safety** - 8 topic headings/16 guidelines
- **Quality** - 9 topic headings/23 guidelines
- **Multidisciplinary** (Regulatory Communications)
  - **Medical Dictionary** - MedDRA
  - **Electronic Standards** - ESTRI, E2B
- In 1996 ICH industry representatives proposed assembling the information generated by these harmonized guidances in the same order
- Goal was to decrease the amount of time and staff needed to assemble and disassemble documents for submission to ICH regions

# Table of Contents Comparison

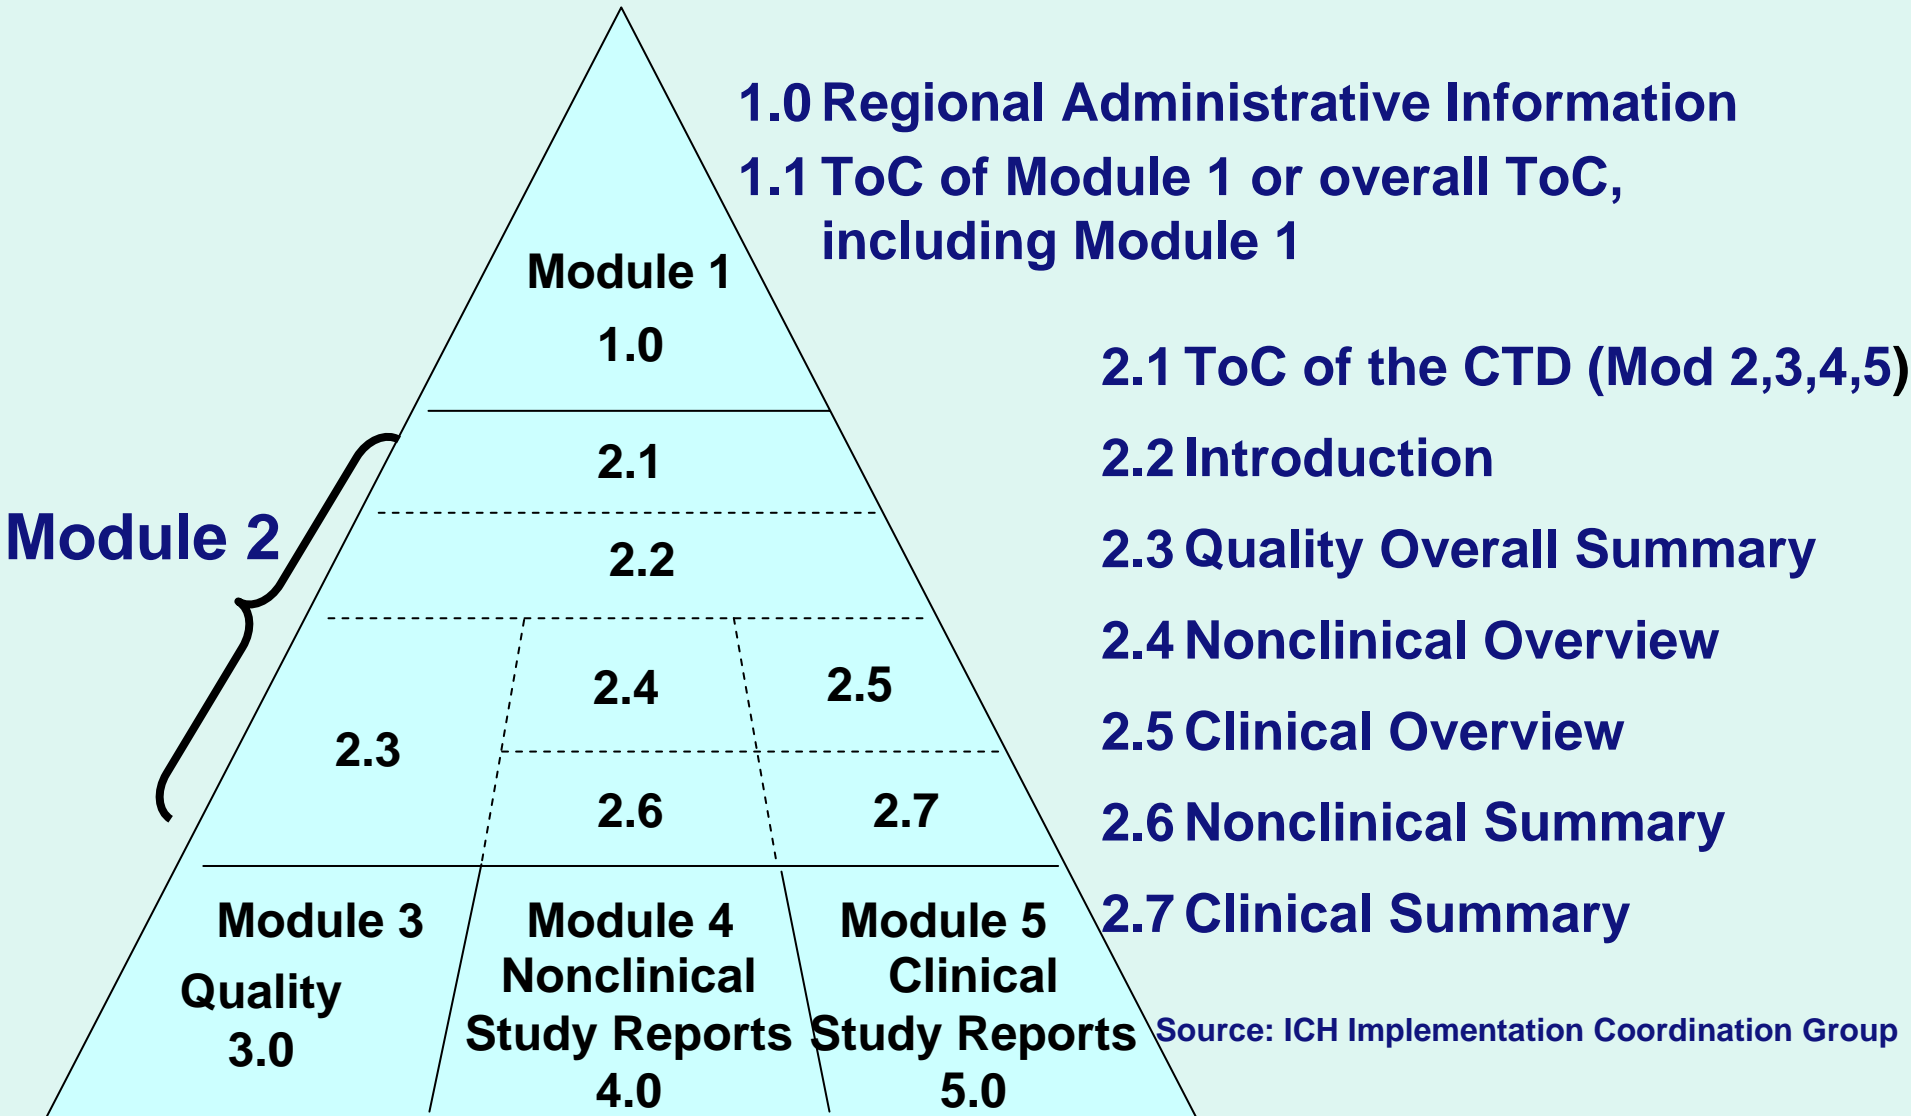

## New Drug Application U.S.A.

## E.U. MA Application

(Human PK, BA also in Part 6 of US NDA)

# Common Technical Document

# **Benefits of the CTD FDA Perspective**

- More “reviewable” applications
- Complete, well-organized submissions
- More predictable format
- More consistent reviews
- Easier analysis across applications
- Easier exchange of information
- Facilitates electronic submissions

# **The CTD is not a “Global Dossier”!**

- A common misunderstanding by those not involved in ICH
  - Submission’s content different for US, EU and Japan, based on individual regulations
  - Some regulations never discussed in ICH
- CTD is an agreed upon common format for the “modular” presentation of summaries, reports and data
- Incorporates relevant ICH guidelines as building blocks and puts them in the same order for submission to ICH regions

# Common Technical Document

- Although the CTD provides a common format for new drug applications, the actual content must still meet local regulations and statutes
- As a result, despite being presented in the same order, the required content of modules 2-5 may vary by region

# **July 1, 2003**

## **CTD mandatory in the EU and Japan**

- **“Highly Recommended”** by FDA
- ICH documents have always been considered GUIDANCE by FDA
- Good Guidance Practice (GGPs)
  - Final Rule September 19, 2000
- GGPs require that the CTD not be mandatory since guidance
- Due to Regulation--Not an indication of lack of commitment to ICH or the CTD

# **eCTD Submissions**

# Guidance for Industry

- The following specifications will be provided with this guidance as stand alone documents:
  - ICH eCTD Specification 3.2 February 2004
  - FDA Module 1 Specification
  - FDA Modules 2-5 Specification
  - FDA Comprehensive eCTD  
Table of Contents Headings and Hierarchy
  - Study Tagging Files Specification

Last Update  
March 2004

# ISS/ISE eCTD Update

- M4: The CTD -- Efficacy [[HTML](#)] or [[PDF](#)]
- M4: The CTD -- Efficacy Questions and Answers [[HTML](#)] or [[PDF](#)] (Issued 12/2004, Posted 12/22/2004)
  - New! Clarification for Q&A 10 on submitting integrated summaries of safety and effectiveness (ISS/ISE) in the eCTD format [[esrs/eCTD page](#)].

# U.S. Food and Drug Administration

## Placement of Integrated Summaries of Safety and Effectiveness (ISS/ISE) in Applications Submitted in the eCTD Format

The CTD summary sections in Module 2 **are not** the correct location for the integrated summaries of safety and effectiveness (ISS/ISE) required by 21 CFR 314.50 (see [ICH M4: The CTD -- Efficacy Q&As](#), and [presentations](#) from the 2006 Drug Information Association Meeting).

CTD submissions are being submitted electronically, it is important that the location of ISS/ISE information in an eCTD be consistent:

- In an eCTD, the ISE and ISS go in Module 5, section 5.3.5.3.

# Implementation Process Flow

*Process*

*Implementation Step*

*Actions*

Good guideline topic selection

**Topic Selection**

Guideline must be value-added and 'implementable'

Formal communication process

**Dissemination**

Use multiple avenues

Active distribution

**Publication**

Targeted; via meetings; also to non-ICH groups

Educating users

**ICH-2: Orlando 1993**

**ICH-3: Yokohama 1995**

**ICH-4: Brussels 1997**

**ICH-5: San Diego 2000**

**ICH-6: Osaka 2003**

**ICH-7: ?? 2007**

A stylized graphic featuring a globe with green landmasses and blue oceans. The globe is centered and surrounded by several concentric blue circles that fade out towards the edges of the frame. The background is black.

# **ICH Global Cooperation Group**

# Global Cooperation Group (GCG)

- Established March 1999 as sub-committee of ICH Steering Committee
- Formed to respond to growing interest in ICH guidelines
  - Four brochures published on ICH and GCG, available at ICH website [www.ich.org](http://www.ich.org)
- Name reflects desire to establish links with non-ICH regions
- Membership :
  - 6 ICH parties
  - 2 Observers (WHO and Health Canada)
  - ICH secretariat

# Shift in Focus

- Initial focus on **information-sharing**
- Soon became clear that more active **engagement** was necessary to respond to increasing interest in ICH and ICH guidelines
- Invited participation of regional pharmaceutical harmonization initiatives

# Regional Harmonization Initiatives

- **APEC**
  - Asia-Pacific Economic Cooperation
- **ASEAN**
  - Association of the Southeast Asian Nations
- **GCC**
  - Gulf Cooperation Council
- **PANDRH**
  - Pan American Network for Drug Regulatory Harmonization
- **SADC**
  - Southern African Development Community

# APEC

Swaziland  
Tanzania  
Zambia  
Zimbabwe

# GCG Mission Statement

To promote a mutual understanding of regional initiatives in order to facilitate harmonization processes related to ICH guidelines regionally and globally; and to strengthen the capacity of drug regulatory authorities and industry to utilize them.

# Harmonization and Regulation

- Moving beyond bounds of ICH
- Serve as unique forum for harmonization initiatives to discuss
  - Best practices, lessons learned and innovative approaches to harmonization and regulation
  - ICH topics of interest
  - Technical guidelines beyond scope of ICH
